

PROJECT

RICOCHET

OPEN SOURCE EXPERTS

S E R V I C E S

OPEN SOURCE

We believe in the power of Open Source. The frameworks we specialize in dramatically bring down costs and development times traditionally associated with rich, dynamic, and scalable web applications.

DRUPAL

Drupal is one of the world's premier Content Management Systems (CMS). Through our contributions to the Drupal community, as well as the hundreds of websites and web applications we've developed in Drupal, we've proven our extensive expertise in the platform.

METEOR

Meteor is an Open Source platform for building highly interactive and dynamic applications in a fraction of the time that a traditional web app would take to develop. We'd love to share with you how your company can leverage this amazing server-side JavaScript platform for your next application.

NODE.JS

Node.js is changing the face of web development with its ability to forge robust, dynamic, event-driven and highly scalable web applications. Utilizing server-side JavaScript, your application can have functionality that even just a few years ago would have been impossible.

← SERVICES →

MOBILE

Each year, more and more visitors to your site or web app are doing so on a mobile device. We can help your team craft an effective mobile strategy utilizing the most appropriate mobile technologies.

MOBILE APPS

We are experts in mobile application development. Using PhoneGap and similar technologies, we develop apps in a fraction of the time mobile projects took even just a few years ago.

RESPONSIVE DESIGN

A “responsive” design and layout means that your website or app will fluidly and gracefully adapt to all devices, screen types and media. We have extensive experience with responsive frameworks, design patterns, and best practices.

INDUSTRIES

HEALTHCARE & MORE

We work on projects that matter. We are happiest when catalyzing innovation with startups and established tech companies — and improving patient outcomes via cutting-edge applications in Healthcare.

TECH & STARTUP

Our talented team of Open Source experts is used by start-ups throughout the Bay Area and beyond to balance out an internal team's skill-set, serve as a scalable resource in times of high demand, and provide insights into software best practices. We can do the same for you.

HEALTH & MEDICINE

The time has come to advance Healthcare innovation with leaner, lighter and more agile software development approaches. Project Ricochet specializes in Open Source frameworks that cut the fat and waste from innovative Healthcare software development.

EVERYTHING ELSE

Project Ricochet has extensive experience in Education, Finance, Publishing, Food and Wine, Retail and more. Our team has solved tough problems spanning multiple industries with Open Source. From API integration to custom solutions from scratch, our team is here to help.

FROM OUR

CLIENTS

“

Project Ricochet is unquestionably the most dynamic, professional, and stunningly responsive web development team we have ever had the pleasure of working with.

”

CAROL SCHRADER

SCHRADER CELLARS

“We feel lucky to have found Ricochet and our minds are at ease knowing they are part of our team at UCSF.”

TWEEDIE GAINES

UCSF MEDICAL CENTER

“Ricochet has been an invaluable partner in the development of our Drupal sites. I would not hesitate to turn to Ricochet for upcoming projects.”

CASEY CHEUNG

FUTURE US

“Ricochet has shown their commitment to our success again and again, working collaboratively across our team to make it happen, and putting in the extra effort when needed to meet our business goals.”

DAVID SAFFREN

BLURB.COM

“Not only is Ricochet professional and fast, they are great guys to interact with on a daily basis. I would recommend Ricochet for projects large and small.”

SUZY BATES

FOUR KITCHENS

“Ricochet has the right balance of high-touch professionalism while being true “geeks” at heart. They are adaptive and flexible, with a keen sense of what it takes to keep a project on track.”

GREG MERRITT

UC BERKELEY

“Ricochet has been a true partner in maintaining our web presence.”

APRIL TURNER

MARKETTOOLS

OUR TEAM

Project Ricochet is a team of Open Source experts. We stay immersed in the cutting edge of software so that our clients can stay focused on delivering value to their customers.

FOCUSED TALENT

We focus on projects that can successfully leverage aspects of Drupal, Node.js, and Meteor. Each team member on a project adds strategic value – be it front or back-end expertise, content strategy, systems architecture, or dev-ops.

SMALL & MIGHTY

We are a compact team of Open Source professionals. As such, we can focus on the projects that interest us most, utilizing technologies we find most exciting. This passion for our work shines in the projects we do.

OUR PHILOSOPHY

We don't pad our time and materials estimates and we always strive to deliver a project under budget. Honesty and integrity guide everything that we do.

ENTREPRENEURS AT HEART

Roughly 30% of our company is dedicated to launching our own entrepreneurial products. We know what it takes to launch. The lessons learned and technologies mastered in this process translate to a more well-rounded and effective team for our clients.

For a decade, our clients have relied on our expertise in Open Source technologies. We love what we do.
